

Plan for Discussing SQL Language in Chapters 6 and 7 as in the book and in course slide notes

1. SQL DDL

- i. Create Table and other construct instructions discussed in Ch 6, slides 1 to 27;
- ii. SQL commands for modifying the database and table schemas in (Ch. 7, Slides 31 to 35).
 - a. DROP TABLE instructions
 - b. Alter TABLE instructions.

2. SQL Data Manipulation Language (DML) is used for loading, deleting, updating and querying data and includes

- i. INSERT INTO instructions (Slides 44 to 52 of Ch 6).
- ii. DELETE FROM instructions (Slides 44 to 52 of Ch 6).
- iii. UPDATE instructions (Slides 44 to 52 of Ch 6).
- iv. SQL DML for querying data in the database (Basic SPJ queries) (Slides 28 to 43 of Ch 6).
- v. More complex versions of SELECT command with nesting etc. are seen in the rest of Ch. 7 not yet discussed.
